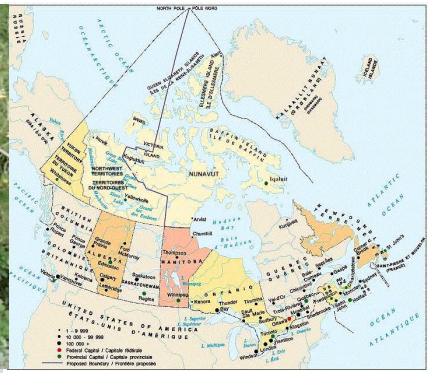
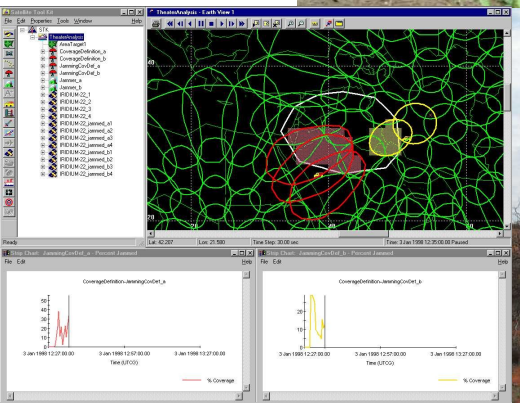
Military Application of Commercial Global PCS
C3I Group / Space and UAV Communications Panel





Program Name: Workshop on the Military use of emerging civil SATCOM systems

Objective: To identify the military application and limitations of commercial mobile satellite systems

Payoff: Concept of operations for allied use of emerging systems such as Iridium and Globalstar

Participants:

DSTO DREO, DERA AFR,MIT, CRC SPAWAR

Future Activities: Evaluation of emerging systems

Panel trials for vulnerability and performance assessment of the Iridium system were done in the UK, at Polar latitudes across CA, and in Woomera AS. The trials validated the theoretical analysis [illegible] by the panel
